

Membership Registration Guide

A quick step-by-step guide for completing and submitting your GMAP membership application.

Membership Registration

Before you begin

Have your contact information and U.S. address ready. Fields marked with an asterisk (*) are required. Your email address will become your Member Login ID after approval and account activation.

1 Enter your personal and contact information

Provide your full name, email address, phone number, Mymensingh-region district, and the requested membership type.

2 Complete your U.S. address

Street, city, state, and ZIP code are required. Use the address where GMAP can reliably identify your current U.S. residence.

3 Create your member password

Use the password requirements shown in the form and confirm the same password. After approval, your email and password are used for Member Login.

4 Add a profile photo if you wish

A profile photo is optional. If you upload one, use a clear JPG, PNG, or WebP image within the displayed file-size limit.

5 Review the required agreements

- Membership Agreement: review the Terms & Conditions first; the agreement checkbox unlocks after the required review step.
- Privacy Policy acknowledgment: required before submission.
- SMS consent: optional and not required for membership.

6 Submit your application

Review the information for accuracy, then select Submit Membership Application . The form will show a status message if anything required is missing or if submission succeeds.

7 What happens next

Your application goes through committee review. Member Dashboard access becomes available only after approval and activation. Keep access to the email address you used during registration.

Accessibility tip: You can complete the form using the keyboard. Use Tab and Shift+Tab to move between controls, Space to select checkboxes, and Enter or Space to activate buttons. The guide itself can be closed with Escape.

Accessibility: Tagged PDF structure (PDF/UA-1 target), logical headings, readable contrast, and selectable text. Website controls remain the authoritative interactive experience.
